# MESSAGE FROM THE BOARD CHAIR

“

I JOINED MICHIGAN BREASTFEEDING NETWORK, AS A BOARD MEMBER, ALMOST TWO YEARS AGO. DURING THAT TIME, WE WERE JUST ENTERING A SPACE OF “FOUNDATIONAL TRANSFORMATION” WHICH INCLUDED LISTENING, REFLECTING, AND CHANGING HOW WE CONDUCT OUR WORK AS AN ORGANIZATION. THIS SPACE PROVIDED US WITH TIME TO REDEFINE HOW WE DO OUR WORK, MAKING SURE JUSTICE AND EQUITY ARE AT THE CENTER OF EVERYTHING WE DO. ALTHOUGH IT WAS A HARD ROAD TO TRAVEL, IT ALLOWED US A MOMENT TO RE-ORIENT OURSELVES TO WHERE LISTENING AND LEARNING ARE CENTRAL TO WHO WE ARE NOW.

SYSTEMS OF INEQUITY ARE THE CENTRAL ROADBLOCKS TO BREASTFEEDING SUCCESS AND IT IS SO REAFFIRMING TO BE A PART OF AN ORGANIZATION THAT’S TRULY WORKING TO ADDRESS THE BREASTFEEDING INEQUITIES THAT EXIST WITHIN OUR SOCIETY. MY DOCTORAL RESEARCH WAS FOCUSED ON THE IMPORTANCE OF SOCIAL NETWORKS AND THEIR INFLUENCE ON BREASTFEEDING OUTCOMES. WE NEED MORE PEOPLE AND ORGANIZATIONS NURTURING THE PATHWAYS OF SUPPORT FOR BREASTFEEDING FAMILIES - AND I SEE MIBFN DOING THAT! I AM EXCITED TO BE A PART OF THIS JOURNEY WITH MIBFN, KNOWING THAT WE ARE BUILDING A SUSTAINABLE, COMMUNITY-DRIVEN, GRASSROOTS MOVEMENT.

I AM SO PROUD TO LEAD THIS GROUP OF COMMITTED STAFF AND VOLUNTEERS. WE ARE COLLABORATING AND SUPPORTING OUR COMMUNITIES THROUGHOUT THE STATE TO CREATE A BREASTFEEDING-SUPPORTIVE CULTURE FOR ALL FAMILIES. AS YOU READ THROUGH THE FOLLOWING PAGES, I HOPE YOU’LL BE AS INSPIRED AS I AM TO SUPPORT THIS IMPORTANT, LIFE-CHANGING WORK.”

# MESSAGE FROM THE DIRECTOR

Dear colleague,

Because of supporters like you, in the last year, the Great Lakes Breastfeeding Webinars have been viewed over 7,245 times by health care workers across the globe; more than 100 families in Flint are benefitting from a Village Model of care grounded in community leadership who both reflect and represent the Flint community; a dozen birthing families of color in Battle Creek and Detroit are connecting weekly in sisterhood and building a virtual community for breastfeeding success; and dozens of breastfeeding supporters from all corners of the state are breaking down geographic silos to network, incubate ideas, take action, and achieve outcomes for and by the communities we serve. **Thank you for everything you do to make Michigan a more breastfeeding-supportive state.**

Every professional medical organization recognizes the vital necessity of breastfeeding infants and young children. The American Academy of Pediatrics (AAP) recommends exclusive breastfeeding until six months and the World Health Organization (WHO) recommends continued breastfeeding until at least two years of age. However, our national and statewide breastfeeding initiation and duration rates do not reflect these guidelines. And, dismantling the systems of oppression that got us here - white supremacy, capitalism, and patriarchy - may take generations. We have centuries of intentional disruption of traditional birth, exploitation of women's bodies, and separation of families to credit for that. But, it doesn't have to be this way. **With people like the MIBFN Board of Directors and staff, the growing group of breastfeeding supporters with whom we serve, and you, a better way forward can be realized.**

COVID-19 has made our work even more urgent. But, this is not just an issue of educating and pressuring more families to breastfeed. The overwhelming majority of families across Michigan already choose to breastfeed. Data from the 2020 CDC Breastfeeding Report Card reports that in Michigan 85.3 percent of families initiate breastfeeding. However, only 58 percent of Michigan infants are still breastfed at six months, and of those babies, only 25.8 percent are exclusively breastfed in accordance with AAP and WHO recommendations. Why is that? Because our systems are not set up for breastfeeding families. **In order to put breastfeeding success within reach, we need to change systems, not families.**

We must do better. And, with your support, we can. I hope you will see the love, passion, commitment, and joy we bring to our work. We love what we do, and we especially love the people with whom we serve. With your support, our work can grow, and it must. **This cannot wait. For the health of our children, for the health of our families, for our future, the time is now.**

In solidarity,

Shannon McKenney Shubert, MPH, CLC  
Executive Director, Michigan Breastfeeding Network

**Human milk is truly liquid gold.** We have known for decades that human milk adapts to meet the needs of the growing child - fat and caloric counts shift in communication between the child's saliva and the parent's breast. We know that colostrum, the first milk after birth, lines the gut for a lifetime of better health. Human milk research has also demonstrated that some of the most harmful strains of bacteria and viruses can not survive inside human milk. And, as the COVID-19 data comes out, these findings continue to be affirmed.

***Breastfeeding saves lives, especially during emergencies.***

## OUR MISSION

---

We endeavor to lead the statewide collaborative actions for **advocacy, education and coalition-building** to create a supportive breastfeeding culture.

## OUR APPROACH

---

As we move forward as an organization with equity at the center of our mission-driven work, we have begun the work of addressing breastfeeding inequities and health-related outcomes. One way of addressing breastfeeding inequities is to listen and learn alongside communities that have been traditionally underserved and to amplify their current work to address these disparities.

**To be a trustworthy partner in these efforts, our approach revolves around listening, learning, planning, and transparency.**

## OUR VISION

---

We envision all families living and working in a **breastfeeding-supportive culture**.

# GOALS

Provide relevant and timely education on how to work toward eliminating the systemic and structural barriers that prevent breastfeeding success.

Connect breastfeeding education with access to equitable and sustainable employment for those who provide breastfeeding support.

## ADVOCACY

Change systems, not families.

Serve alongside leaders and community advocates within systems, as a partner for breastfeeding-specific solutions.

Advance breastfeeding-supportive administrative and legislative policies.

Increase the visibility of policy makers who adopt breastfeeding-supportive policies.

## COALITION BUILDING

Cultivate and support breastfeeding coalitions in every Michigan community – including tribal, ethnic, geographic, and cultural communities.

Ensure that coalition members reflect and represent the communities they serve.

## OUR WORKING DEFINITION OF RACIAL EQUITY

*Disparities in breastfeeding are perpetuated by inequities that have historically and currently centered white people and their experiences. Racial equity in breastfeeding is both a process and an outcome. The process of working towards racial equity in breastfeeding involves purposefully decentering white supremacy and colonialism, including the notion that whiteness is the standard of normalcy, beauty, superiority, and centrality in our society. This process involves trusting Black and Indigenous families, elevating their voices, and investing in their communities. The outcome of racial equity is the adoption of breastfeeding-supportive policies and practices that eliminate negative health outcomes caused by systemic racism and realized when the social construct of race is no longer a predictor of breastfeeding outcomes.*

**BECOME PART OF THE CHANGE**

---

**Breastfeeding saves lives.** With COVID-19 impacting communities throughout Michigan and around the world, now is the time more than ever to dismantle systemic barriers that prevent breastfeeding feasibility and success for families across the state. Breastfeeding helps to reduce health disparities among families of color caused by long-standing systemic racism present within communities and the healthcare system.

The Michigan Breastfeeding Network knows that breastfeeding is evidence-based practice, and that evidence-based policies and practices can help to eradicate these differences when implemented equitably and early in a variety of care settings. By demonstrating commitment to reduce health disparities for families of color, our whole society can be strengthened.
