### WHAT PEOPLE ARE SAYING

"I gained more knowledge about the prison system and policies that impact pregnant and breastfeeding people who are incarcerated. I would be interested in getting involved with local jails/prisons here to provide lactation support."

"I'm committed to spending time reaching out to our local prison and jail to see how pregnant and breast/chestfeeding people are faring locally and how I can support facilitating healthy outcomes for parents and children. Also absolutely going to contact local and state legislators."

"I was stunned. This was an eye opening webinar. I often train and liaise with wider teams about care plans and I had no idea how many barriers faced lactating incarcerated individuals and their children!"
