

PLEASE VOTE TO PASS EXPANSION OF THE MICHIGAN BREASTFEEDING ANTI-DISCRIMINATION ACT

SENATE BILL 351 OF 2023

WHAT DOES THIS BILL DO?

This bill expands upon the current Breastfeeding Anti-Discrimination Act (passed in 2014) to now include protection for human milk expression (i.e., pumping in public).

WHY IS IT NECESSARY?

It's essential to protect folks who occasionally, regularly, or exclusively pump/express human milk for any reason. The priority, above all, is increasing access to human milk!

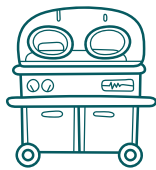

More than 90% of Michigan human milk feeding families express milk at some point during their feeding journey

Human milk - including milk expression - lowers health care costs by preventing diseases like ear infections, diabetes, leukemia, and other cancers

This legislation is good for local businesses because it will attract customers to stay longer and not rush off to feed their babies

It is especially important for medically-fragile babies who oftentimes are fed expressed human milk exclusively

Protecting milk expression makes Michigan a great place to raise a family
