Available October 18, 2022 through October 16, 2023

CONTINUING EDUCATION

WHAT PEOPLE ARE SAYING

"It was incredibly helpful to have the recent formula shortages explained by a knowledgeable and trustworthy source."

"I was fascinated by the history of formula use. I knew that it was promoted as an alternative equivalent to breastmilk by formula manufacturers (which is false), but was not aware of the true degree of manipulation that has been part of that."
