Available April 16 2024 through December 31, 2024

CONTINUING EDUCATION

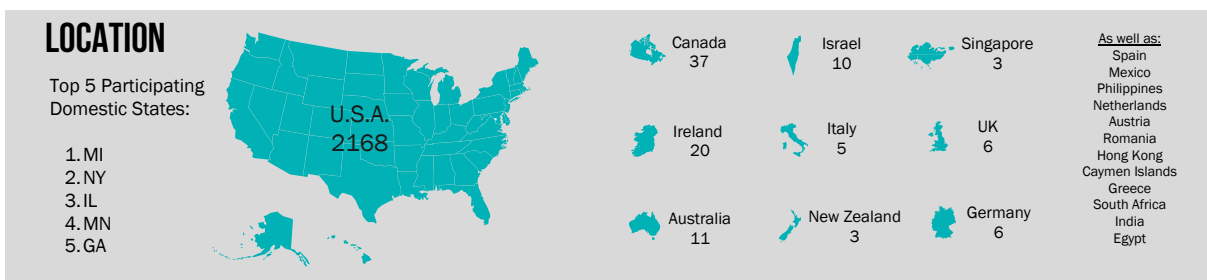

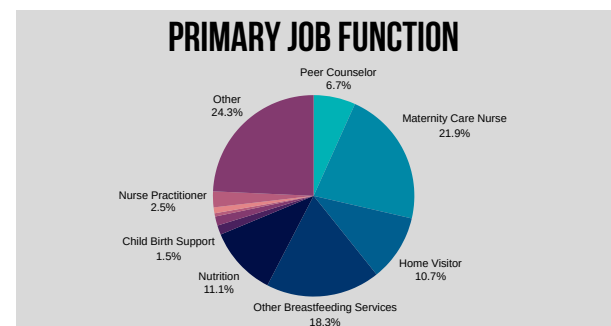

WHAT PEOPLE ARE SAYING

"This webinar truly challenged my thinking about the communities I serve. It made me realize that both I and my hospital may be doing a disservice by promoting an abstinence-only approach to safe sleep. I work in a rural, under-resourced community that could greatly benefit from enhanced lactation support and personalized, culturally responsive education on safe sleep practices. This panel discussion brought critical attention to an issue that deserves much more focus."

"The emphasis on safe sleep practices for infants was particularly valuable. The presenters effectively conveyed complex information in an accessible manner, which made it easy to understand and apply."
