WHAT PEOPLE ARE SAYING

"I loved hearing the clear risks presented without deriding the 'norm' of formula in a bottle as first line of supplement. The facts were clear without being negative. The focus was on a better method."

"Keep offering these programs! Please!! I love that these presentations are free and easy to access! Glad I was able to stop and restart without losing my progress as I had to pause at work several times!"

"Great timing for me with this webinar as I was walking into work for a meeting and a formula rep was just finishing her presentation to a group of staff including all the 'gifts' she brought to share. So frustrating!"
